ALLMA[®]:

**A microalgae food
Brand offering a
nutritional and
sustainable
choice**

by Carla Lima, Business Development Team

Allma is more than a brand, is a concept. Allma seeks to promote a nutritionally healthy and tasty diet, encouraging an active, sustainable and balanced routine and lifestyle. Allma by Allmicroalgae is a Portuguese microalgae brand of supplements and naturally nutritious and healthy food products.

It is the brand's ambition to contribute to the food market with unique and sustainable algae of high nutritional value, such as Spirulina, and, mainly, Chlorella vulgaris in organic, smooth, yellow, and white varieties, perfect for the most diverse food recipes. These last 3 microalgae are totally different and unique on the market due to their attractive color and neutral taste!

The potencial is endless.

**Discover its
unique
natural
effects and
properties**

Chlorella vulgaris is a microalgae known for centuries for being a source and food supplement for various peoples, such as the Aztecs, and is currently considered a superfood and a trend all over the world!

There are numerous scientific studies of high international renown that highlight the functionality of Chlorella vulgaris, contributing to well-being and a balanced and healthy lifestyle.

Chlorella can be consumed in capsules, tablets, or powder. The powder can be added to create naturally delicious recipes, making your meals or snacks nutritional and healthy. Try it in fruit juices and shakes, smoothies, soups, yogurt, cheeses, sauces, or other recipes.
